How to make a flippity manipulatives (tiles) phonics board:

1. Click this template link located on this page: <https://www.flippity.net/Manipulatives.htm> & make a copy.
2. Retitle (i.e. Sazon 1 flippity board lesson 94), go to bottom and double-click the green “demo” tab- rename it (i.e. S1L94).
3. Also on bottom, go into the options tab and choose “in order.”
4. Go back to the first tab, delete all terms and colors, and type in new ones. Any color (though it will be muted) may be used in the second column from https://www.w3schools.com/colors/colors_names.asp & any font size, bold, etc.
5. Click file, publish to the web, hit OK, click the X to get out of it.
6. Go to the last tab, “Get the Link Here,” and hover over the link to get a clickable link. Click it to see the board.
7. Click the gray “share” link at the bottom of the tile board and copy & paste the link in lesson plans or a document to find it later.
8. Click the QR code button, take a screenshot, and paste it into Paint Shop Pro. Cut out the QR code square, paste it into lesson plans or doc (in Word, resize to 3 inches with normal 1 inch margins & title the lesson).
9. Go back to the spreadsheet and click file, publish to the web, and click OFF the check for “automatically republish when changes made.”

******To make changes, be sure to undo step 9 and redo it afterwards.***
